Who We Are

MSAK IT Hub is a Pakistan-based IT and software company delivering custom software, web and mobile applications, UI/UX design, digital marketing and IT consultancy for growing businesses. We work as an embedded technical partner rather than a one-off vendor — from first architecture decisions through to production support — building products that are secure, scalable and genuinely used by the teams they're built for.

Our engineering is full-stack and product-minded: the same team that ships a TypeScript/React front end also designs the data model, the auth layer and the reporting behind it. That's why our recent work spans a restaurant ERP, a serverless retail POS, a CRM, and two marketplace platforms — all shipped end-to-end.

Our Services

01

Custom Software Development

Bespoke systems built around how your business actually operates — ERPs, internal tools, POS and workflow platforms, architected to scale.

02

Web Development

Fast, responsive web applications and marketing sites — from landing pages to full SaaS front ends — built for conversion and performance.

03

Mobile App Development

Native and cross-platform mobile apps for iOS and Android, connected to the same backend and design system as your web product.

04

UI/UX Design

Interface and experience design grounded in real user flows — wireframes through to polished, developer-ready design systems.

05

Digital Marketing

SEO, content and paid strategy that gets a product in front of the right audience — built to compound, not just spike traffic.

06

IT Consultancy

Architecture reviews, technology selection and roadmap planning for teams that need a second, senior technical opinion.

Product Line

Alongside bespoke builds, MSAK IT Hub maintains a library of ready-to-customize management systems for common business types — a faster, lower-cost starting point than building from zero, with the same option to extend into a fully custom system as the business grows.

Cafe Management
POS • ORDERS • INVENTORY

Gym Management
MEMBERS • BILLING • PLANS

Hospital Management
PATIENTS • RECORDS • BILLING

Library Management
CATALOG • LENDING • FINES

Office Management

AI ASSISTANT

Featured Projects

ERP

2026

A restaurant operating system that runs sales, supply chain, finance and HR from one workspace.

TYPESCRIPT

ERP

AI

VapeHub Pro POS

2025

A serverless point-of-sale that scales from a single till to a full retail chain.

SERVERLESS

POS

RETAIL

Cadence

2026

The CRM revenue teams actually keep updated — pipeline, forecasting and automation in one clean surface.

SAAS

CRM

HomeServe

2025

A two-sided marketplace connecting homeowners with vetted plumbers, electricians and cleaners.

MARKETPLACE

WEB APP

Hostello

2026

Verified student hostel discovery and roommate-matching platform, built for university cities across Pakistan.

EDTECH

Why Work With Us

01 Full-stack, product-minded

One team owns front end, backend and data — no handoffs, no lost context.

03 AI-native builds

Recent products ship with working AI assistants, not bolted-on chatbots.

02 Domain depth

Real shipped experience in ERP, POS, CRM and two-sided marketplaces.

04 Transparent verification

Internship certificates and project claims are independently checkable — see msakithub.com/verify-certificate.

Let's build something.
